

Tough and Reliable
with Great Looks
at a Low Cost

Conventional Smoke & Heat Detector

● Model: FT103

Compatible with all conventional Fire alarm control panel

Dual LEDs

Two LEDs blink standby, provide 360° visibility

Unique optical sensing chamber

Engineered to sense smoke by a wide range of combustion sources

High Precision Electronic Thermistor

Engineered to sense temperature quick and accurate

Unpolarized wire input

To prevent the likelihood of wiring errors

General Description

The detector is a combined smoke and heat detector with photoelectronic sensor and heat thermistor together.

This detector is designed to provide open area protection and to be used with most conventional fire alarm control panel.

Two LEDs on each detector provide local 360° visible alarm indication. They flash every 3~5 seconds indicating that power is applied and the detector is working properly. The LEDs latch on in alarm. LEDs will be off when a trouble condition exists indicating that the detector sensitivity is outside the listed limit. The detector can be reset only by a momentary power interruption.

Features and Benefits

- Compatible with all the conventional fire alarm control panel
- Unpolarized wire input
- Wide range of operating voltages
- Unique optical sensing chamber and High precision electronic thermistor
- Built in microprocessor intelligent software
- Two LEDs blink standby, provide 360° visibility
- Insect-resistant Screening
- Twist-on mounting base with tamper lock
- Drift compensation and smoothing algorithms
- Remote Indicator LED can be connected.

Conventional Smoke & Heat Detector

Installation Guidelines

All wiring must be installed in compliance with the National Electrical Code, applicable state and local codes, and any special requirements of the local Authority Having Jurisdiction.

Figure 1. Dimension of detector:

Technical Specifications

Diameter: 103mm
 Height (including mounting base): 55 mm
 Weight: 155 g
 Operating Temperature Range: -10°C to 50°C
 Operating Humidity Range: 10% to 93% Relative Humidity, Noncondensing
 Latching Alarm: Reset by momentary power interruption

Electrical Ratings

System Voltage (nominal): 24 VDC (9V~ 28VDC)
 Standby Current: 60 µA @ 24VDC
 Alarm Current: 30 mA @ 24VDC
 Fixed Temperature Rating: 57°C (135°F)
 Rate of Rise Detection: Responds to greater than 15°F/min
